

Striping & Markings

Making Navigation Easy, Safe, and Compliant

Striping and markings are more than an afterthought – they’re essential to your project’s safety and aesthetic appearance.

In fact, striping and markings are the foundation of Ace Asphalt, which began more than 40 years ago as Parking Stripes, Inc., a Wisconsin-based one-man show.

Today, your striping and markings are just as important to Ace as they were back then. Whether giving your existing lines a fresh coat or completely re-designing your traffic flow, we offer a full array of customized markings and striping to help keep your surface looking great, ADA compliant and safe for vehicles and pedestrians.

Benefits

Maximize Parking: Our striping services allow you to take full advantage of your parking area by maximizing the number of available spaces.

Improve Traffic Flow: With the right design, we’ll help ensure a safer and smoother traffic flow throughout your property.

Increase Visibility: Fresh lines and markings will help drivers and pedestrians see where they are going – even during times of low visibility.

ADA Compliance: Our knowledge of accessible design ensures your pavement markings are compliant with ADA requirements, thus limiting your liability while providing proper access.

Application

Whether your project is new construction or maintenance of existing, we’re ready to put the finishing touch on your surface. Our services include parking stall stripes, directional arrows, stenciled instructions, handicap symbols, fire curbing, loading zones, crosswalks, stop bars, and any customized markings tailored to your business.

We start by making sure your surface is free from moisture and debris. We then mark or outline the area requiring paint. Next, we apply the paint using airless striping equipment that provides crisp, clean edges while reducing waste and pollution from overspray. We pay particular attention to both the thickness of the paint and the width of the marking so that precise and uniform lines result. Finally, we’ll add any signage or reflectors your property may require.

Available Options

- *Parking stalls
- *Handicap symbols
- *Stenciled instructions
- *Directional arrows
- *Curbing & speed bumps
- *Loading zones
